Profile

I am a highly competent IT professional with a proven track record in designing websites, and managing databases. I have strong technical skills as well as excellent interpersonal skills, enabling me to interact with a wide range of clients. I am eager to be challenged in order to grow and further improve my IT skills. My greatest passion in life is using my technical know-how to benefit other people and organisations.

Experience

Back-end Developer

CV IDS (Internship) | 2020 Jan - Jun

For the first time in the world of industry as the apprentice, with the projects called "kejar.id". I interned as a back-end developer at CV IDS. During my internship, I can implement a software engineering concept to create an API for the application. Also, I can contribute in the field to maintenance and manage a big database of the application.

Full-stack Developer

CV IDS | 2020 Jun - Aug

Besides the internship, because the company that I interned liked my programming skills and my attitude, I was hired and start to feel as the real employee, no longer an apprentice, exactly a full-stack developer at CV IDS during my online school. I was able to work in many fields of the software engineering program and enjoyed working with the interdisciplinary team and families. And, yeeaaa! it was my first salary.

Education

Wikrama Vocational High School

Garut | 2018 - 2021

Cigombong Junior High School

Bogor | 2015 - 2018

Projects

2019
